Sad Little Plant Sale

Fall Plant Notes

*Helping you to realize your
garden visions for over a
decade.*

Dear Friends,

You know the drill! It's time once again for the annual **Sad Little Plant Sale** where we rummage through the nursery finding all manner of plants that would like to find a new home. More details below!

Just a reminder - if you have planted any new shrubs and trees this year, be mindful of the amount of water they are getting as we go into the winter. Even older trees and shrubs may be susceptible to the drying winter winds and this has been a particularly hot

summer for us this year. More details in the section below on Notes for Fall.

Come out to the nursery and load up on plants for your gardens. Our nursery hours for the fall are 9 AM to 4 PM every day except closed on Sundays. We look forward to seeing you here at OGS!

Cheers,

Al Pfeiffer, Owner
Oriental Garden Supply

Sad Little Plant Sale:

Yes, this is the one you have been waiting for all year. Not just a one-day wonder, but great deals throughout the week!

If you are not familiar with the SLPS, we search the nursery for all kinds of plants that need a loving home. Every day we will be pulling items from all over the nursery, both big and small, and pricing them to sell. You can get some great deals on plants that might need just a little loving care or are the last ones of that particular variety hanging out here at the nursery. We get to clear the mats before winter comes and you get to take home some wonderful plants to nurse back to their full glory.

Here is an example of the deals we are offering:

These perennials are \$5 each or 3 for \$12 any combination:

- C1 Campanula carpatica 'White Clips'
- C1 Veronica spicata 'Red Fox'
- C1 Clematis 'Serious Black'
- C1 Scabiosa columbaria 'Pink Mist'
- C2 Arundo donax 'Variegata'
- C1 Polemonium boreale 'Heavenly Habit'
- C2 Schizachyrium sco. 'Smoke Signal'
- C3 Erianthus ravenne
- C2 Chasmanthium latifolium
- C1 Festuca glauca 'Boulder Blue'

Other trees and shrubs starting at \$5. Both big and small plants available.

Note that some sale plants may be too large for customer's vehicle, but delivery is available.

And if you are an online customer that isn't local to us and can't get to our nursery, we've got a **10% off regular price SLPS Coupon** below you can use.

We have a lot of plants around here (and more arriving weekly) that really want to be planted out, so we encourage you to come out and see what you can find for that empty spot (or spots) in your landscape!

Fall Plant Notes:

Fall is a wonderful time of year, not only for us, but for the plants too. It usually is an ideal time to be installing all kinds of plants particularly perennials, and deciduous and evergreen shrubs and trees. Why? The soil is still warm which encourages good root growth and the roots will continue to grow until the ground freezes. These new roots will get the plant off to a quick start in the spring, faster than plants planted in the cool spring soils.

A warning for those who want to move some trees and shrubs around their yard: there are some that do not transplant (or dig) well in the fall, although they do fine if transplanted from containers such as we have at the nursery. Also, the later in the season that perennials are divided and moved, the less time they will have to put down roots, and frost upheaval can be severe and damaging. Keep this in mind and be sure to mulch these new transplants well.

It is important to check all your plantings (in particular, those planted this year) until the ground freezes to assure that your plants are getting enough moisture to survive the drying winter winds. Use a moisture meter, or stick your finger in the soil near the roots of smaller plants, or dig six inches down about a foot away from the rootball area of larger plants - is the soil still dry? Then water again! Fall drought, even after the leaves have dropped, can damage a plant, even well-established plantings. Needled evergreens and broadleaf types like rhododendron are particularly vulnerable to desiccation and winterburn. If you have any questions, be sure to ask us!
